Metallic Details MDMDR14420	1:144	<p>Antares Rocket Antares (also Taurus II), is an expendable launch system, developed by Orbital Sciences Corporation (now Northrop Grumman) and the Yuzhnoye Design Bureau to launch the Cygnus spacecraft to the International Space Station.</p> <p>Able to launch payloads heavier than 8,000 kg into low-Earth orbit.</p> <p>Antares launches from the Mid-Atlantic Regional Spaceport and made its inaugural flight on April 21, 2013."</p>	Space kits (resin)	Catalogue	£197.99	2
Anigrand Craftwork ANIG5003	1:144	<p>Molniya Buran OK-GLI space shuttle. In 1974, after failure of the N-1 Lunar rocket, the Soviet military preferred a new family of modular following the loss of space race to America. In 1976, the Ministers of the USSR launched the program of the reusable spacecraft system. The former OKB-1 bureau was restructured to NPO Energia enterprise that in charge of the program development. The U.S. shuttle design was studied by Soviet ...</p>	Space kits (resin)	Catalogue	£77.99	1
Anigrand Craftwork ANIG5009	1:144	<p>Martin SLV-5C Titan IIIC / MOL, X-20, IDCSP. In 1955, the USAF served a backup in case the first ICBM Atlas development ran fail. It was decided to develop a second system, the Martin Titan I. Later the Titan II with greater range and lifting capacity was initiated. In 1958, the Air Force asked to evaluate proposal for launching a X-20 piloted orbital glider. The Titan II was modified by adding two strap-on solid motors for th...</p>	Space kits (resin)	Catalogue	£87.99	2
Anigrand Craftwork ANIG5007	1:144	<p>Lifting bodies set. In 1957, NASA had investigated the problems associated with re-entry from space of missile nose cone. Engineers conceived the lifting body idea that by modifying a cone shape, aerodynamic lift could be produced to fly back from space rather than plunge to the earth. This study led to the design known as the M-2, a 'M'odified half-cone, rounded on bottom and flat on top, with twin tail-fins. This configurati...</p>	Space kits (resin)	Catalogue	£57.99	2

Anigrand Craftwork ANIG5008	1:144	X-33, X-34, X-37, X-40A, X-42 X-planes RLV compilation set. In early 1990s, US congress requested to reduce funding for Space Shuttle operations. It is difficult for NASA to reduce costs without affecting safety. Many studies suggest that a Reusable Launch Vehicle (RLV) designed for quick-turnaround operation after each flight will allow for costs reduction. In 1994, NASA launched the RLV programs to demonstrate technologies o...	Space kits (resin)	Catalogue	£87.99	1
Anigrand Craftwork ANIG5002	1:144	Molniya Buran OK-1.01 space shuttle. In 1974, after failure of the N-1 Lunar rocket, the Soviet military preferred a new family of modular following the loss of space race to America. In 1976, the Ministers of the USSR launched the program of the reusable spacecraft system. The former OKB-1 bureau was restructured to NPO Energia enterprise that in charge of the program development. The U.S. shuttle design was studied by Soviet...	Space kits (resin)	Catalogue	£77.99	2
Anigrand Craftwork ANIG5005	1:144	Salyut Polyus- Orbital Weapons Platform. In 1983, U.S. President Reagan launched a 'Star Wars' program, a shield intended to defend the U.S. against nuclear attack from any place on earth. The Soviet Union immediately accused the United States of seeking to militarily dominate over the others. The USS R. chairman Andropov sought to bring about a treaty banning military weapons from space, and authorized the design of counter-m...	Space kits (resin)	Catalogue	£47.99	1
Anigrand Craftwork ANIG5001	1:144	NPO Energia Rocket. In 1974, after failure of the N-1 Lunar rocket, the Soviet military preferred a new family of modular following the loss of space race to America. In 1976, the Ministers of the USSR launched the program of the reusable spacecraft system. The former OKB-1 bureau was restructured to NPO Energia enterprise that in charge of the program development. The U.S. shuttle design was studied by Soviet rocket scientist...
