Anigrand Craftswork ANIG2065	1:72	Convair Atlas-A/-B/-D/X-11/X-12/XB-65/SM-65 B/CGM-16D 1st ICBM. In October 1945, U.S. Army issued supersonic missile requirement to the industries which received many military missiles technical papers from Nazi Germany. In 1946, Convair submitted several proposals and was received funding for the MX-774 rocket study. In 1949, Soviet detonated its first nuclear weapon, U.S.A.F. gave highest priority to Convair to develop a more...	Space kits (resin)	Limited Availability	£48.33	1
Anigrand Craftswork ANIG2078	1:72	Martin Titan II/SM-68B ICBM. In 1955, while the first U.S. ICBM Atlas was developed, the U.S.A.F. served a backup in case the Atlas ran fail. It was decided to develop a complete second ICBM system. Martin was awarded a contract for this backup ICBM, designated XB-68/XSM-68 Titan I. Even as the first Titan I were rolling off the assembly line, the Air Force was searching for a way to improve the Titan I after the Soviet Sputni...	Space kits (resin)	Catalogue	£56.66	2
Anigrand Craftswork ANIG5001	1:144	NPO Energia Rocket. In 1974, after failure of the N-1 Lunar rocket, the Soviet military preferred a new family of modular following the loss of space race to America. In 1976, the Ministers of the USSR launched the program of the reusable spacecraft system. The former OKB-1 bureau was restructured to NPO Energia enterprise that in charge of the program development. The U.S. shuttle design was studied by Soviet rocket scientist... Anigrand Craftswork ANIG5004	1:144	Molniya Buran OK-92 space shuttle. In 1972, U.S. President Nixon approved a program to develop a reusable Space Shuttle system. In the USSR, the space shuttle was viewed first of all as a carrier of nuclear weapons. The Soviet military convinced that U.S. planned to use the shuttle for a pre-emptive nuclear strike on Russia. Therefore the USSR needed an analogous capability to maintain the strategic balance. In 1976, the Minis...	Space kits (resin)	Limited Availability	£64.99	2
Anigrand Craftswork ANIG5005	1:144	Salyut Polyus- Orbital Weapons Platform. In 1983, U.S. President Reagan launched a 'Star Wars' program, a shield intended to defend the U.S. against nuclear attack from any place on earth. The Soviet Union immediately accused the United States of seeking to militarily dominate over the others. The USS R. chairman Andropov sought to bring about a treaty banning military weapons from space, and authorized the design of counter-m...	Space kits (resin)	Limited Availability	£39.99	1
Anigrand Craftswork ANIG5006	1:72	Martin-Boeing XMS-1. Original Dyna-Soar configuration. In 1945, millions of German military documents were confiscated by USAAF. One of the concept was the Sanger aerospace bomber. During post-war years, Bell was selected for further studies on rocket-bomber which named BoMi. In 1956, the USAF channeled Bell's development to a reconnaissance, bombardment vehicle. A competition for a prototype was opened. In 1959, Boeing won th...	Space kits (resin)	Catalogue	£81.66	1

Anigrand Craftswork ANIG5007	1:144	Lifting bodies set. In 1957, NASA had investigated the problems associated with re-entry from space of missile nose cone. Engineers conceived the lifting body idea that by modifying a cone shape, aerodynamic lift could be produced to fly back from space rather than plunge to the earth. This study led to the design known as the M-2, a 'M'odified half-cone, rounded on bottom and flat on top, with twin tail-fins. This configurati...	Space kits (resin)	Catalogue	£48.33	1
Anigrand Craftswork ANIG5008	1:144	X-33, X-34, X-37, X-40A, X-42 X-planes RLV compilation set. In early 1990s, US congress requested to reduce funding for Space Shuttle operations. It is difficult for NASA to reduce costs without affecting safety. Many studies suggest that a Reusable Launch Vehicle (RLV) designed for quick-turnaround operation after each flight will allow for costs reduction. In 1994, NASA launched the RLV programs to demonstrate technologies o...	Space kits (resin)	Catalogue	£73.33	2
Anigrand Craftswork ANIG5009	1:144	Martin SLV-5C Titan IIIC / MOL, X-20, IDCSP. In 1955, the USAF served a backup in case the first ICBM Atlas development ran fail. It was decided to develop a second system, the Martin Titan I. Later the Titan II with greater range and lifting capacity was initiated. In 1958, the Air Force asked to evaluate proposal for launching a X-20 piloted orbital glider. The Titan II was modified by adding two strap-on solid motors for th... Metallic Details MDMDR14420	1:144	Antares Rocket Antares (also Taurus II), is an expendable launch system, developed by Orbital Sciences Corporation (now Northrop Grumman) and the Yuzhnoye Design Bureau to launch the Cygnus spacecraft to the International Space Station. Able to launch payloads heavier than 8,000 kg into low-Earth orbit. Antares launches from the Mid-Atlantic Regional Spaceport and made its inaugural flight on April 21, 2013."
