Special Navy SN72006	1:72	RE-RELEASED! 'Biber' German Midget Submarine / kleinkampfbande Biber The Biber was one of the weapon systems developed during the Second World War at the time when the situation on both fronts was gradually becoming worse and worse for Germany. In 1943 it became clear that the Allied invasion would take place soon somewhere on the Atlantic coast of the continent and the German military began to seek and develop new and rather ...	Ship kits, full hull (injection)	Future Releases	£11.83	0
Special Navy SN72002	1:72	BACK IN STOCK! Type IIA U-Boat. Typ IIA U-boot was the first German mass produced submarine for the newly built Nazi Germany's Kriegsmarine. Most of the submarine crews were trained on this submarine class before the outbreak of the war. When the war broke out Typ II submarines took part in initial fights. With the introduction of the new Typ VII the older Typ IIs were, again used for training tasks. This is the first injecti...	Ship kits, full hull (injection)	New Arrivals	£58.33	8
Special Navy SN72001	1:72	Type XXIII U-Boat. Injection moulded with resin and etched parts. U boot typ XXIII was one of the last submarine types deployed to war by Germans. It was the so-called coastal type. It was equipped with two torpedoes and 14 crewmembers. Submarine Type XXIIIs were designed with respect to low radar profile. That's why the last two sunken ships are credited to submarine Type XXIIIs. The design of this submarine was so advanced t...	Ship kits, full hull (injection)	New Arrivals	£49.33	9
